

In the Cities of Dubuque and Montreal
the Corporations shall annually levy a special tax for the
support of Schools on real estate, or on whatever is
liable to taxation or assessment under the acts of
incorporation of the said Cities or amendments thereon,
not less than one fiftieth of a Cent for dollar of the
value of such taxable property, said tax to be assessed
and levied in the same manner as the annual assessments
in such cities for municipal purposes.

The Corporations in each of the said Cities
shall cause to be kept a correct list of the Roman Catholic
and Protestant rate-payers, with the value of their
property and shall pay to the Roman Catholic and
Protestant Boards respectively the amount of rates levied
from citizens of each faith for the support of Schools, provided
always that the property of Roman Catholics can only
be assessed for the support of Roman Catholic Schools, and
the property of Protestants assessed to support Protestant Schools.
All persons who cannot be designated as Roman Catholic
or Protestant, shall by a written declaration to the City Treasurer
state to which Board of School Commissioners the school-tax
on their properties shall be paid. But the taxes levied from
incorporated Companies and public bodies not of a
religious character shall be divided in the same ratio
with the Government grant for the same year to the
respective Boards.

The School Commissioners shall annually
report to the Corporations of the said Cities the expenditure
of the sums granted to them, in such manner and at
such time as the said Corporations shall appoint.

On requisition of the Roman Catholic and
Protestant Boards of School Commissioners, or of either of
them, additional sums may be levied to such extent as
the Corporation may approve, either for school buildings
or for the support of Schools.

Col. Elphinstone re arrival
of Prince Arthur

Spencer Ford
Quebec
18 Sept. 1869

Col. Elphinstone presents
his compliments to the Mayor
of Montreal & begs to state that
H. R. H. Prince Arthur will
arrive at the Railway Station
at 5 P. M. on Monday, & that
he will at once get into his own
carriage & drive up to Mr.
Ross's house quite quietly.

Colonel Stephenson begs
 to repeat that the Prince wishes
 his visit to be strictly quiet,
 as the Prince will not admit
 a present of his receiving an
 address etc.. Should the Mayor
 himself however be at the
 Station the Prince would be
 glad to be introduced to him..

Colonel Stephenson hopes
 that without creating any notice
 of the Prince's visit, the Mayor
 will be able to manage to have

the platform kept free..
 [Faint, mostly illegible handwritten text continues on the right page, appearing to be a continuation of the letter or a separate note.]

Deputy

Assistant Adjutant General of Militia Comd. No 5 Div. Dist.

Montreal May 10th 1869

Sir

I have the honor to acknowledge
 the receipt of your letter
 of the 4th inst. informing
 me that on the 21st ult.
 the City Council had passed
 a vote to the effect that from
 and after the first June next
 the City Concert Hall and
 adjoining rooms will cease
 to be used for drilling pur-
 -poses.

As the Council may not
 be aware that this action
 will have the effect of pre-
 -venting nearly every Vol. Militia
 corps[#] from completing their
 annual drill by the end
 of the financial year, June
 30th, and therefore of de-
 -priving them of their
 Drill-pay

in Montreal

The City Clerk

d. d. d.

Montreal

Dill-pay,

I request that you will
have the goodness to inform
the gentlemen of the Council
of this fact; with the hope
that they will at all events
modify their order, so that
the corps may drill in the
Hall, & adjoining rooms up
to the end of June; instead
of the commencement of that
month.

I cannot avoid, with
the greatest respect for the
Council, commenting on the
Extraordinary fact that not
a fortnight previously to the
Resolution in question having
been passed; permission was
given by the civic authorities
to allow additional corps
to drill in the City Hall,
until the completion of
the Dill Hall, afforded

other accomodation; and,
that, relying as a matter
of course on the good faith
of the parties to this arrange-
-ment, the Government have
form to considerable expense
in moving the arms and
stores of various sorts.

I note this fact in the
hope that when brought to
the notice of the Council it
may induce a reconsideration
of this motion.

I have the honor to be,
Sir,

Your obedient Servant

W. P. Marshall Smith

Atty. Genl.

No. 1. Phil. Dist.

1 10th May 1869

Letter from
Lt. Col. M. O
Smith - in
reference to the
~~use~~ use of the
Cannon Hall
for drilling
purposes -

1

Gentlemen

It is more in Compliance with an established Custom, than in accordance with my own Convictions, as to my ability either to Council or direct you in the discharge of your important duties, that I offer the following remarks upon this the Commencement of another year of our joint labours.

And first, permit me to thank you Gentlemen, for that kind Consideration and forbearance which on all occasions, you have evinced towards me, in the progress of our deliberations during the past year —

Entering as I did on the duties of Mayor, without any previous experience, I have had often to rely upon your patience & kindness in the discharge of those important duties.

and not unfrequently when I have anticipated the greatest embarrassment I have found by your indulgence, and the constant politeness of the City Clerk, the least difficulty.

Finance

The Financial Statements, which in a few days will be laid before you, will exhibit the affairs of the City in a most prosperous condition.

Notwithstanding that the City of Montreal, in comparison to other Cities on this Continent, is very lightly taxed, our Revenue is ample for all purposes, and without any increased burthens upon the Citizens, is annually increasing:

In the year 1866 it was	\$621,834
In — do — 1867 — " —	705,679
And the year just closed	
1868 it has been	812,300

Our floating Casual indebtedness to Bankers and other sources, has been paid off, and had it not been

been for the very large amount we have, from the operation of the expropriation law, been compelled to deposit in Court for expropriation purposes, our Cash account would exhibit a large balance on hand, for employment if we thought fit in the redemption of our unmaturing Bonds.

Whilst upon the one hand the active Revenue of the City exhibits these pleasing features, the Consolidated liabilities, and fixed assets of the Corporation exhibit results which are not less gratifying.

Although the present Bonded or Consolidated debt of the City is put down, in round numbers at five Million dollars (\$5,000,000) it is strictly speaking not more than one Million, because we have in fixed ~~assets~~ property and actual bona fide

^H
bonifide assets, the safe repre-
sentative of four Millions, yielding
a corresponding revenue, so that
in reality our taxation has only to
provide for the interest on one
Million.

That these gratifying results
are properly appreciated in the
Financial World, is fully de-
monstrated, by the present price
of our City obligations, as compared
with other securities, and with
former years, in our Money Market.

Our 7% Consols having reached
a premium of 10 per Cent

⁴
Water

It is to be hoped that the
doubts and anxieties, which have
so long pervaded the Council,
and the City generally, upon the
question of the Water Supply, have
found a solution, and will soon
entirely disappear, under the
successful application of Steampower
as an auxiliary pumping force.

The present temporary derangement of this power, consequent upon some defect, not in the Engine but between the Engine house & the supply Basin, or settling Pond, though certainly very inconvenient at this season, ought not to discourage, in as much as such "Contre-temps" or mishaps are almost inseparable from new enterprises of this magnitude.

All intelligent, impartial judgements will discern, that a defect or derangement in the supply pipe which brings the water to be pumped, would equally derange, Breast wheel, Turbine wheel, Steam, or any other power, and should therefore not be chargeable as an inherent defect, against any of these modes of pumping - I entertain no doubt myself, that in a few days the defect will be repaired

and

6
and the Steam Engine be again
permitted to proceed with its work,
fill the Reservoirs, and supply
~~and~~ the City as before.

5 Let us earnestly ^{hope} that during
the coming year, our progress
as to good results & further im-
provements, in this important
service, may be equally success-
ful, and that ere long a per-
manent and abundant supply
of water, at all seasons of the
year, may be secured to the
City.

Fire-force
&
Fire Alarm

Our Fire Force and Fire
Alarm System, are equally
creditable to the City.

In true efficiency and prompt
action, in extinguishing fires,
they are perhaps unrivaled on
this Continent, and with such
perfect discipline & working
as they exhibit, it is difficult
to see, with a proper supply of
water,

7

Water, how any extensive conflagration could again afflict our city.

Every thing in relation to the administration of these most important departments, reflects credit upon all connected with them.

That important arm of the Civil Power, the Police Force, though quite too small to meet the wants of such a large City, performs its difficult & onerous duties with much credit and efficiency. As an orderly well conducted and well disciplined body it is worthy of all praise.

The Recorders Court in connection with it, is ably presided over, and discharges its trying duties with vigour and impartiality, and both these services are no doubt a constant terror to evil doers.

It is matter for serious consideration that loud complaints continue to be made

Police

Consisting
of 150 men
Officers

Recorders
Court

Roads

8
made by the Citizens generally,
respecting the very bad Condition of
our Streets and Roads. No member
of the Council exceeds in energetic
intelligence the worthy Alderman
who presides over this department,
and we all know that if better
results are not shown, the fault
rests not with him, nor the officers
under him, but springs from the
fact, that heretofore, the material
he has had to employ in these
works, has been quite unfit for
the purpose, and the appropriations
which have been made to the Road
7 Department have been quite inadequate
to the indispensable requirements of
that Department. I would most
respectfully recommend that for
the coming year, more ample provision
be made for this service. That
"Panc Rouge" Stone only be used
as

9
as a Metal, that Stone breaking Machines
and Road Rollers be purchased, and
that the side paths be uniformly made
with asphalt or other approved composition,
in order that our Streets and roads may
be put and maintained in a State
of thorough repair.

Health
Notwithstanding the increased
vigilance of the Sanitary police, the
public health of the City is still far
from satisfactory.

The death rate last year, rose to
within a fraction of 40 per 1,000
or one in every 25. — That of Boston
averaging one in 44, and the Island
of Montreal, outside the City one in 66.

8
The average weekly death rate of
Children last year in winter, was
64 per 1000, in Spring 90 per 1000,
Summer 146 per 1000, which rose
in one week to 209 per 1000, against
one winter week of 44 per 1000.

These results shew how much
in this most

in this most important department is yet to be done.

Our Health Committee should have power to prohibit the erection of dwellings upon low or swampy lands without proper drainage, and our Inspector of Buildings should be empowered to prevent the construction of any building intended either for factory or dwelling, without proper regard to ventilation through and through.

All wooden drains should be taken up and replaced with good vitrified clay pipe. Sewers, ^{+ drains} should be trapped and flushed in warm weather, and every means taken to prevent the people from saturating the soil in their yards & Courts with slops and filthy water.

Baths ⁹

Permanent Baths, gratis & well regulated for the public use, would be a great auxiliary to the promotion of health and cleanliness. These
might

might be more than paid for by a little increased vigilance in the collection of the Dog Tax, which Tax is at present largely evaded.

As previously shown our City is rich in means for all the necessary ~~requirements~~ discipline & requirements towards perfect efficiency in every department. The Revenue for the year just closed, exceeds by over a hundred thousand dollars, that of the previous year - it is \$812,300

812,300
 705,679
 106,621

The chief items of expenditure during the year, are as follows

Roads	138,429
Water _____	74,994
do permanent works _____	60,477
	135,471
Fire	24,811
Light	18,634
Health	5,818
Police	74,088
Recorders Court	10,312
	<u>\$407,563</u>

In closing these remarks I am happy in being able to bear testimony to the zeal and assiduity of the Officers of the Corporation, who upon all occasions manifest a deep interest in their duties, and a desire to give public satisfaction.

I trust that the same good feeling and forbearance, which during the past year characterised our labours and debates, may be constantly maintained in the coming year, and that at its close we may have reason to look back with satisfaction upon the progress we have made for the public good.

William Dornum
Mayor

1869

Inaugural address
of Mayor Wm Workman.
