New Glasgow April 8th 1841.

Sir,

I send you some evidence on the election which I have collected.

I am of opinion that if there is any thing like a fair trial that the Docyor cannot sit.

His Friends in St.Therease are very doubtfull about it.

I should like to have your ideas upon the evidence sent particularly No.2 as it involves deeply the Executive and you may feel assured that Mr. Wm. Turnbulls evidence is good and is ready at any time to substantiate it, he is a man of undoubted integrity.

I wrote you last week but no answer has come to hand.

Please send me two copies of your Letter to the electors I have read the first part it is greatly sought to have extensive circulation.

Mr Mc Adam promises to send some evidence about the Stone Breakers Mc Cullochs friends here are at war with each other about the division of the pluhder.

Messers Bateous & Mc Allister St Therese have had a regular Boxing Match.

I sincerely trust that every thing will be done to render justice to the County by preventing Mc Cullosh the Executive hireling from sitting.

There are a goodly number of able Reformers returned, which ought to inspire the Freeholders of Terrebonne with hopes of being again reinstated with the realty of

reality of enfranchisement instead of its shadow.

My opinion is that the Doctor and his partisans are much dissatisfied in the manner the farce ended.

Had the two parties come to blows a screen would in some measure have been given to their infamy - Your humanity has however laid the base transaction without any palliation uncovered before a discerning World.

Would a Petition to the Assembly not be better than a Declaration embodying the means resorted too with the contents of No 2. to bring on a collision with the Executive Perhaps you may have time to answer this with Mr Shovelm.

I remain Sir Your obedient servant
